

Construction Estimating & Bidding Course

This **20-hour course** will walk you through the construction estimating process, including Blueprint Reading. Learn what the primes are looking at when they choose their sub-contractor. Learn how to work up a reliable budget estimate based on actual materials and design features that can be used for more than one project.

Course Review:

- Introduction (Project Information, Identify Market for Proposal, Required documents for Proposal, Scope of Work, ect.)
- Working Drawings
- Understanding Specifications
- Calculating Liner, Measure, Area and Volume
- Quality Take-off
- Understanding Material & Labor
- General Requirements
- Existing Conditions
- Training on Building Cost Software & Technology
- Training to Apply Learning Skills
